Ensuring Every Voice is Heard, Every Word is Clear.

Configuration and Operation

The transcription system can be installed on a fully configured Auditel PC delivered as a 1U 19" rack or desktop chassis. The PC will include all necessary interfaces and internal ground isolated XLR sound card.

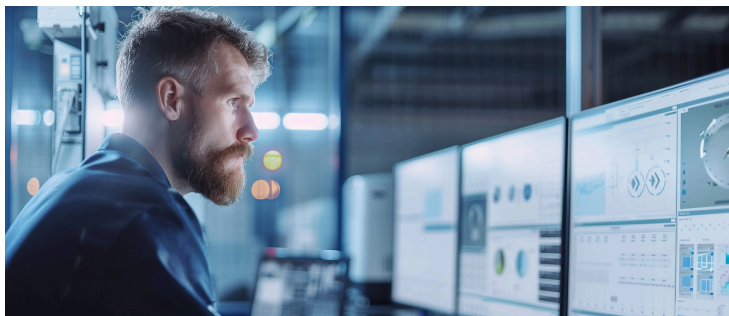

Setting up your system: Our cutting-edge system is designed for effortless installation in just two simple parts:

Operator Control Application: Installed on your operator PC (or seamlessly integrated with the Auditel ACCS PC as part of a broader Auditel Conference System), this powerful tool puts you in complete control. Start or stop services for accurate billing and customize subtitle overlay graphics with ease.

Dedicated Transcription/Subtitling PC: Free up resources and maximize efficiency! This dedicated PC handles the heavy lifting, interfacing directly with advanced cloud AI to deliver flawless, real-time subtitle graphics!
